1 Security Warnings

- Do not allow access to the secure PC device by other people.
- Do not allow installation of non-trusted software on the secure phone.

2 Installation

- Click on "setup.exe"
- A simple installation wizard will perform the Gold Lock Enterprise installation on the computer.

3 Configuration

- When Gold Lock is first activated, you will need to input the following details:
 - Login details - the email and password of your Gold Lock account (if you do not yet have those, please sign up at www.gold-lock.com)
 - Select a name for your secure device. This will be used by you and your secure contacts to identify your device.
- To change the application language, press "Menu", "Settings" and select the requested "Language".
- In the "Settings" screen, a few parameters are available for modification, there is no need to change any parameter unless requested by a Gold Lock support agent.

4 Usage

4.1 Add Secure Contact

Select Menu => Add Contact

Insert the device name of your secure contact and confirm.

4.2 Secure Voice call

At least one secure contact needs to be in your contact list

To initiate a secure voice call, highlight a secure contact, then select Call (contact has to be online)

4.3 Secure Text

To send a secure text message, highlight a secure contact, then select "Text" (contact has to be online)

Inset text, then press the "Send" button .

4.4 Secure File Transfer

To securely send a file, highlight a secure contact, then select "File" (contact has to be online)

Select the file you wish to send, secure transfer will then begin.

4.5 Multiple Tabs

Each secure conversation, text or file transfer is displayed in a separate tab, you can freely switch between tabs during calls by pressing on the requested tab. Double clicking a tab closes it.

4.6 Manage Secure Contacts

Sign in to your account at www.gold-lock.com to manage everything related to your device and secure contacts
